

ANALYZER GIGA

ENTERPRISE-LEVEL INTERNET MANAGEMENT AND REPORTING

- ▶ **Analyze Gigabytes of Data**
- ▶ **Increase Bandwidth Efficiency**
- ▶ **Improve Productivity and Morale**
- ▶ **Reduce Security and Legal Threats**

WebSpy Analyzer Giga 1.0 provides unparalleled reporting on Internet usage for large enterprises, with support for most popular firewall and proxy applications in a simple-to-use interface.

What differentiates Analyzer Giga from previous WebSpy products is its ability to efficiently load and analyze gigabytes of data, making it a true enterprise-scale monitoring solution, suitable for any large organization.

KEY FEATURES
